

MultiTest-xt Overview

Quality managers needing an easy-to-use force testing system for the production area should look no further than Mecmesin's range of MultiTest-*xt* test frames.

With the MultiTest-*xt*, tension & compression tests are performed at the push of a button, making it ideal for routine quality control of a wide array of products, materials & components.

It is specifically designed for environments where throughput, productivity and minimal training are vital and where the use of a computer is not always suitable.

Key Features

Operators

- · Password protected log-in identifies operator for full traceability
- · Fast access to 5 favourite tests customised icons ensure instant test selection
- · Unlimited library storage of test methods minimises set-up time
- · Easy-to-use with minimal training 'Simplicity itself' one button launches the test
- · Large, easy-to-read touch screen display clearly shows Test Results and Graph
- · Colour-coded indication of 'Pass' or 'Fail' immediately alerts the operator
- · Test Report print a comprehensive report of results tailored to your needs

Administrators

- · Easy programming intuitive menus guide you through creation of test routines
- · Customised reports create your own tailored report
- Choice of 3 program modes:
 - 'Quick Test' for basic force testing
 - 'Program Test' for standard test routines
 - 'Advanced Test' for sophisticated test routines
- · Rugged construction ideal for Production and QC Lab Environments
- · Simple touch screen interface no separate computer required
- · 1000Hz data sampling rate ensures accurate capture of peak loads
- · USB output save test routines and results to a memory stick or network
- · Flexible 'plug & play' for easy interchange of loadcells
- · Wide range of test stands capacities from 500 N to 50 kN

Easy-to-use Touch Screen Console

Secure Access

The MultiTest-*xt* features multiple levels of password-protected access. 'Master' users have full access to all the test set-up and reporting functions. Pre-defined 'read-only' tests can be used by 'operators' preventing inadvertent changes to the test parameters. Operators can be granted additional access rights (e.g. sample deletion) according to their privileges.

As an extra level of security each test sample and set of results can be tagged with the name of the operator and the date and time of the test. This traceability is designed to assist manufacturers wishing to comply with regulatory requirements for the storage of test results.

easy-to-use touch screen operation robust, stand-alone system

Quick Test

- · Save time no need to create a full program
- Run a basic tensile or compression test on one screen
- · Ideal for occasional one-off testing

Couldn't be simpler...

1. Select Quick Test Calculations Speed & Load Choose which pre-defined calculations **Test Type** Define parameters such are required by simply ticking a as speed, load & extension Select test type check box 2. **Quick Test** Calculations Test ✓ Load @ break O Compression • Tension ✓ Extension @ break Speed: 50 mm/min Extension @ target load O Run to extension Run to load Load @ target extension ✓ Load @ maximum load Load: 20.00 Ν Extension @ maximum load __ Break detection **Graph Settings** Break %: 75 Load/Displacement O Load/Time O Others Displacement/Time ✓ Pre-test Tare Load Y-Axis: X-Axis: ✓ Pre-test Tare Extension Run Cancel

Run

Program Test

- · Ideal for hosting established tests
- · Create multi-stage test routines to run to load, displacement or break
- Frequently used tests can be assigned to '5 Favourite' buttons
- · Save unlimited number of tests in a library for easy storage and access

Flexible - Choice of 3 Program Modes

Advanced Test

If your application requires more sophisticated control of the test machine the MultiTest-*xt* can be upgraded by purchasing the optional Advanced Program Builder Software to enable the Advanced Test functionality.

QC Lab

Use a separate PC to create multi-stage programs using the Advanced Program Builder Software

Load and run a program on the MultiTest-*xt* via the Advanced Test button

With this option you have dedicated access to Emperor[™], Mecmesin's powerful premium force testing software. Emperor[™] has an open-architecture structure allowing access to a comprehensive library of calculations, which can be tailored to suit your requirements plus a suite of machine-control commands allowing you to create more complex multi-stage programs.

Once created these programs can then be uploaded via a network or memory stick onto the MultiTest-*xt* and run by simply pressing the Advanced Test button and choosing the program from the list of available tests.

Live Test Screen

When a test routine has been selected and the test performed, the operator can view the results in 2 selectable formats:

Either...

Results & Graph

Or...

Results Only

- · Easy-to-read, comprehensive display of test results
- · Results for each sample are clearly tabulated
- Colour-coded 'Pass' or 'Fail' notifications for quick & easy interpretation of results

Mecmesin 0 mm/min 0.00 N 0.00 mm Results Sample 1 Sample 2 Sample 3 MEAN SD Results Included 1 1 1 Test Started 11:30 13/05/2010 11:42 13/05/2010 11:47 13/05/2010 Results for all 1234.00 1235.00 1236.00 1235.00 1.00 Batch No samples tested 23.27 N 30.15 N 31.91 N 28.44 N 4.57 Peak 1 are displayed Peak 2 21.60 N 29.04 N 28.61 N 26.42 N 4.18 1.73 Average Peel Force 8.22 N 3.78 N C:\Documents and Settings\All Users\Application Data\ Mecmesin\Emperor-xt\Force\Results\Peel Test-Goblet single trace verdict.for

Reports & Exporting

- Select standard reports or customise your own using built-in templates
- Save test set-up and results via memory stick or network
- Automatic export of data to Microsoft Excel® and SPC packages
- Collect data at 1000 times per second for detailed recording of results from every sample and accurate capture of peak loads

Expandable to your Changing Needs

PLC/Digital Control Interface

The MultiTest-*xt* is fitted with a Digital Control Interface to facilitate communication with external devices such as a PLC (Programmable Logic Controller) or simply a remote footswitch to start the test. The use of a PLC allows you to automate your test routine through loading multiple specimens onto a feeder-carousel thereby increasing productivity and reducing the time spent by an operator on testing.

Tennis ball carousel used with a Mecmesin tester

Wide Range of Capacities from 500N to 50kN

The MultiTest-*xt* is available in a range of capacities to meet your exact testing requirement. Select from single column machines through to advanced twin-column test frames, which have been specifically designed to test large or high-load samples and products.

7 Mecmesin

'Plug & Play' Loadcells

All Mecmesin loadcells are quickly and easily interchangeable with instant recognition of capacity and calibration data - just 'plug & play'.

A complete range of fixing adaptors are available to connect any loadcell to Mecmesin's grips and fixtures.

A MultiTest-*xt* can be easily and economically enhanced by using a different loadcell. You can select an Intelligent Loadcell (ILC) to cover the working range best suited to your tests.

Grips & Fixtures

Grips and fixtures are key elements of our force testing systems, designed for holding a vast range of materials and products such as adhesives, composites, glass, plastics, rubber, textiles and wood. Dedicated grips are specially designed to suit components such as crimped terminals, keypads, PCBs, springs and switches.

If you have a specimen, which cannot be held with a standard grip, Mecmesin engineers have many years experience in designing and manufacturing custom-built fixtures and can provide you with a bespoke solution.

Safety

Mecmesin's MultiTest-*xt* has intrinsic overload protection provided by the software during normal operation.

Furthermore, each MultiTest-*xt* is fitted with mechanical limit switches that prevent damage to accessories and loadcells plus an emergency stop button on the front panel to halt the movement of the crosshead at any time.

Machine guards are available on request if your application requires additional protection for the operator.

Mecmesin also offer column gaiters, which shield the test frame against ingress from small components, dust etc.

9 Mecmesin

Applications

The flexibility and ease-of-use of the MultiTest-*xt* make it ideal for applications ranging from testing common springs right through to sophisticated medical devices.

It is ideal for routine testing where a number of different tests are made by different operators. For example, a Quality Manager might set up a simple 'Accept' or 'Reject' test for use by Goods-in staff. This would be performed with merely a few touches on the console screen and require minimal operator training.

Alternatively, with the Advanced Program Builder, sophisticated multi-stage programs can be created and imported to run on the MultiTest-*xt* - but the operator still only needs to push a few buttons to perform the test.

Mecmesin - a world leader in affordable force and torque testing solutions

testing to perfection

Since 1977, Mecmesin has assisted thousands of companies achieve enhanced quality control in design and production. The Mecmesin brand represents excellence in accuracy, build, service, and value. In production centres and research labs worldwide, designers, engineers, operators, and quality managers endorse Mecmesin force and torque testing systems for their high performance across countless applications.
